OLOPSC tertiary students embrace the culture of research
by Ramon P. Denoso, MAEd.
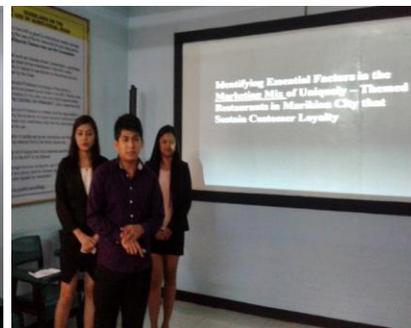

October 2015 in the calendar of the College Department was highlighted by a research colloquium participated in by research students from the different programs. From concepts of acceptability of food variants to marketing mix and benchmarking to proficiency assessment, students exerted a lot of effort preparing for their presentations as a culmination of what they have learned from research during the 1st semester of AY 2015 – 2016. Guided by rubrics on presentations, volunteer faculty members partook in acknowledging and evaluating the ingenious concepts prepared by the researchers.

BSHRM Research Presentations

Theories and concepts on various disciplines taught to students evolve and this is probably a tangible reason why research is indispensable in our ever changing society where changes in concepts, trends, needs, skill requirements and competencies come as fast as they go.

BSBA Research Presentations

Research exposes students to modern practices; allows contemporary researchers to realize the evolution of theories found in the textbooks and lets demonstration of practices become relevant in a more beneficial perspective. As future professionals, they do not only attain their degrees with confidence but are equipped with knowledge and training and are glocally competent and competitive.

EDUC/LA Research Presentation

What might have seemed irrelevant to practice in the past has now grown as a distinct undertaking among students of the college department. Research, indeed, has become concretely evident of the evolving interest of students enrolled in the different programs. As students of the Education and Liberal Arts program prepare for the challenges, commitment and responsibilities they are about to face in the academe, so do students of Business Administration – in the corporate world; BS Hotel and Restaurant Management and BS Tourism Management students – in the hospitality industry and BS Computer Science students – in the techno hub.
